HYBRID TOWER LIGHT

A HISTORY OF INNOVATION

MIN 1 WEEK HIRE

The main benefit of these tower lights is that they can be used in urban areas with strict noise restrictions and are super silent when working from battery power.

These Tower Lights have always been a leader in lowering carbon emissions, plus an added benefit of lowering operating running costs, they can also be charged from mains power. The VT-Hybrid lighting tower features LED floodlights which are powered by rechargeable batteries and have a running time of up 8 hours.

STANDARD SPECIFICATIONS:

Product Code	120102
Model Name	Hybrid Tower Light
Lamps	4 x 150W LED
Min dims (L x W x H)	10.6 x 4.5 x 7.8ft / 3.2 x 1.3 x 2.3m
Max dims (L x W x H)	10.6 x 6.8 x 27.8ft / 3.2 x 2.0 x 8.4m
Weight	1230kg
Fuel cap	160L / 35gal
Fuel savings	£390 per Month
Run time	640hrs
Mast rotation	3400
Wind stability	110km/h
Illuminated area	3300m ²
Noise level	0/92m Lwa @ 7m

KEY FEATURES:

- Average mast max height of 9m
- 340° telescopic mast rotation
- The lighting tower recharges the battery for 5 hours
- Hydraulic lifting system
- When the battery is running the lighting tower runs without noise or carbon emissions
- Carbon emissions reduced by 86%
- Strong vertical galvanized steel mast in 7 sections
- Bunded tank to avoid fuel spillage on the ground
- Lifting eye and forklift pockets
- AMOSS kit - added safety when handbrake is released mast automatically comes down
- Darkness sensor - switches lamps on and off with daylight
- The VT-Hybrid has a timer and a light sensor - saving you money
- Road towable

TYPICAL APPLICATIONS INCLUDE:

- Events
- Rail
- Urban areas
- Emergency Services
