Garic's heavy duty fuel bowzers are fully steel constructed and robust, making them suitable for long term use. All fuel bowzers come with site specification tyres suitable for off road use.

With the additional benefit of mobility, they are the ideal solution for storing and supplying your site equipment with fuel and oil whenever and wherever you need it.

Each fuel bowser is available with a variety of pumps, nozzles and accessories and is ready for delivery to your site in a range of sizes including: 150; 300; 500; 1,000 and 2,000 gallon capacities.
