Developed to provide an off-grid power supply, integrating renewable-power and storage with diesel-power back-up to reduce fuel consumption and carbon emissions. This unit also reduces fuel costs by 80% when compared to a conventional diesel generator.

During daytime operation the energy created by the solar panels is harvested and stored in an on-board lithium ion battery pack. The standby generator is configured to run only when batteries are depleted.

(Requires external fuel tank).

KEY FEATURES:

- Reduced Energy Costs.
- Reduce Environmental Impact and Carbon Footprint
- Increase Competitive Advantage
- Regulatory Compliance e.g. ISO 14001
- Enhanced Corporate Image and Reputation for Environmental Stewardship.
