8 x 8ft / 2.4 x 2.4m	10001L / 2200gal.	1000Kg	225200

Our static water tanks are ideal for sites without mains facilities and offer a flexible and cost effective alternative to laying underground water pipes. They are also fully compatible with our range of accommodation units and water refills are available on demand.

We also stock a comprehensive range of high volume water tanks for very large projects such as piling works, river diversions and over pumping including all the necessary pumps and accessories to suit every requirement.

All our water tanks are available in a wide range of sizes and built to ISO standards, using robust heavy duty polyethylene.

### KEY FEATURES:

- Secure water storage facility
- Top water inlet (filler point)
- Steel skid frame
- Lower level fill point (2200gal.)
- Fork pockets
- Heavy duty lifting eyes
- Plastic or steel holding tank (size dependant)

### OPTIONAL EXTRAS AVAILABLE

- Dust Suppression
- Water Replenishment
- Pumps
