Grab handles fitted to all corners	✓
Front marker lights	✓
Leg key	✓
Datatag® security making syste	✓
240v NPU	✓
LPG generator	✓

MIN 1 WEEK HIRE

The body is constructed of GRP-faced ply-board, polished to both sides to give a robust, easy-to-clean finish. All of the floor areas are covered with hard wearing fibreglass gel coat to maximise durability. The corners, doors and frames are supported by aluminium angles and where required the doors are self-closing and fitted with airtight strips. The chassis incorporates a single-axle, rated up to 1,500kg and uses a braked spring-damped tow hitch. For added stability the A-frame is welded to the chassis and the unit incorporates four corner-steadies.

A key focus of the design philosophy is to incorporate features to make their use as maintenance and trouble-free as possible - and therefore cost effective.

KEY FEATURES:

- Single axle to carry up to 1500kg, brake damped tow hitch
- Spring loaded handbrake, 13" wheels and tyres
- A-Frame welded to chassis
- Tow hitch bolted through A-Frame
- Four corner steadies
- Corner steady key included
