**A HISTORY OF INNOVATION**

## STANDARD SPECIFICATIONS:

<b>Dims (L x W x H)</b>	11.2 x 12.8 x 1.8ft / 3.43 x 3.93 x 0.56m
<b>Weight</b>	3500Kg
<b>Roller Diameter</b>	320mm with a 10mm gauge steel
<b>Brakes</b>	4 Heavy duty brakes on all rollers
<b>Brake disk</b>	280mm in Diameter

The Wheel Spinner from Garic is the only cleaning system that can remove clay, mud and stones from between the rear driven wheels of lorries.

Sometimes, simply washing the wheels is not effective enough and often leaves heavy mud, clay and stones stuck dangerously between the twin rear wheels of these vehicles. This can be used alongside the Garic Enviro wheel wash systems.

## KEY FEATURES:

- Totally self-sustaining
- No need for electric or water
- Easy and quick to install
- Extremely heavy duty build to withstand any vehicle
- Vehicles can drive through at up to 15 mph
- Heavy duty air brake system
- Heavy duty rollers with welded ribs for opening the treads during spinning

## OPTIONAL EXTRAS AVAILABLE

- Bespoke colours available
