Overhead storage area	✓
Drying room	✓

Introducing the next evolution in welfare hire! The Hybrid welfare van incorporates the latest in hybrid technology improving welfare, the environment and safety on site. This mobile unit can run the welfare facilities solely from its solar panels meaning that no engine has to be running whilst stationary and the facilities can be used throughout the day. Not only does this create a safer environment for workers and has less impact on the environment this could save you £££s on your bills. Innovation at its best!

KEY FEATURES:

- 200Kg of carbon savings per week (standard use)* (35-70L diesel p/w)
- Annualised circa 10 ton of CO2 savings
- Chapter 8 regulation livery, front and rear LED beacons
- DSVA specification seat belts with reflective strips
- Smart & efficient power storage / lithium battery
- Lowest carbon footprint van on the market (47.9 mpg)
- Auxiliary button to jump start engine
- Unit distributes power through 12V and 240V circuit
- Automatic back up power available
- Rear parking sensors and reversing camera
- Silent Welfare mode
- Solar panels harvest up to 600w, 40amp/hrs in ideal condition.
- Solar panel defrost feature utilising surplus heat, ensures efficient operation in wintery conditions.
- Solar panels will work in all day light conditions, will not shutdown in shade
- 'Keyout' engine management system. Van remains operational without safety or security risk.

*All subject to ongoing field testing
